## About DBIA Rocky Mountain Region

The Design-Build Institute of America (DBIA) is a membership organization that was founded in 1993 to advocate and advance single-source project delivery within the design and construction community. The Rocky Mountain Region of the DBIA was founded in 2002 to focus on this objective throughout Colorado, Montana, Utah, and Wyoming. The design-build method of project delivery embraces architecture, engineering, and construction services under a single contract, thereby re-integrating the roles of designer and constructor. The DBIA Rocky Mountain Region's members include practitioners from all project phases, as well as public and private sector project owners. The DBIA works to disseminate best practices by hosting and conducting educational programs and conferences throughout the year. In addition, within the Rocky Mountain region, the organization supports research and education focused on the design-build process through its annual design-build award contest for collegiate chapters.

### Network with All Design-Build Team Members:

- Public and Private Owners: Utilities, Cities, Municipal Water Districts, Water and Sewer Departments, Waste Treatment Plant and Facility Owners, Transportation Departments, Developers, Financiers and more
- Integrated Project Team Leaders
- Senior Level Executives Representing environmental engineers, contractors and specialists
- All the major suppliers and specialty contractors that support major Infrastructure projects

### Showcase your business by exhibiting or sponsoring

- Over four hours of Exhibit "mix and mingle" time in the Exhibit Area, including: Continental Breakfast in the Exhibitor Area, Coffee Breaks in the Exhibitor Area, During Luncheon, Reception in the Exhibitor Area
